PROFESSIONAL SUMMARY

Detail-oriented Business Analyst with hands-on experience in requirements gathering, business process analysis, and translating business needs into practical, value-driven solutions across retail and operational environments. Skilled in eliciting and documenting business requirements, process mapping, KPI monitoring, and supporting project delivery within Agile frameworks. Strong analytical and problem-solving abilities with experience identifying process improvement opportunities and supporting solution implementation. Proficient in business documentation, data analysis, and collaborating with cross-functional teams to achieve project objectives. Seeking to leverage requirements analysis, process improvement, and solution design skills in a **Business Analyst** role.

CORE SKILLS

Business Analysis: Requirements Gathering & Documentation, Business Process Mapping (As-Is/To-Be), Gap Analysis, Full Project Lifecycle, Solution Design, Risk Management

Agile/Project Management Tools: User stories, Sprint Planning, Backlog Management, JIRA, Confluence, Power BI, Excel Dashboarding, MS Visio (Process Modelling), Word, PowerPoint

Data & Domain: KPI Tracking, Data Visualisation, System Compliance, Root-Cause Analysis, Business Development, Client Relation

Soft Skills: Stakeholder Management, Strategic Decision Making, Problem Solving, Cross-functional Collaboration

WORK EXPERIENCE

Retail Assistant | Primark, Liverpool, UK

Sep 2024 - Present

- Conducted business process analysis of sales and inventory data to forecast demand and define stock optimisation requirements, reducing overstock by over 90%.
- Played a key role in optimizing store performance through data-backed operational adjustments, contributing to the department achieving a "Top 5" ranking out of all national stores
- Collaborated with cross-functional stakeholders to gather and document operational requirements, ensuring replenishment processes aligned with commercial objectives.
- Developed KPI dashboards and analytical reports, providing actionable insights that supported inventory planning and business decision-making.
- Evaluated store workflows and service delivery processes, identifying operational inefficiencies and implementing improvements that reduced delays and enhanced customer experience.
- Recognized as "Colleague of the Quarter" for outstanding performance, reliability, and consistent delivery of high-quality results in a fast-paced retail environment.

Data Specialist | Cloud Factory, Kathmandu, Nepal

Nov 2020 - Nov 2023

- Operated within an Agile environment, actively participating in sprint planning and daily stand-ups to translate client needs into prioritized user stories.
- Contributed to the full project lifecycle for retail technology clients, from requirements gathering and training to delivery and performance monitoring.
- Managed technical requirements for high-growth retail clients (e.g., Ibotta, Pathr.ai), maintaining 98% accuracy in complex data processing workflows.
- Partnered with project leads to translate client objectives into precise data-validation requirements, ensuring high-quality outputs for complex retail technology projects like Ibotta and Pathr.ai.
- Actively engaged in project-wide status meetings to clarify technical requirements and manage expectations, ensuring all stakeholders remained aligned on project benchmarks.
